expertusone
API

The Industry's Best and Broadest REST API Library

100+ APIs and Integration Modules

Extends LMS to External Systems

Sends & Receives Data in Real-time

ExpertusONE offers the most advanced and comprehensive REST API library available. Updated with every ExpertusONE release, your developers can use our APIs to expand and extend their applications in new and creative ways. So now you can easily build new applications, portals or widgets. Or quickly integrate your ExpertusONE LMS with other enterprise and external systems.

Why waste time and money customizing your LMS? ExpertusONE's APIs easily extend your learning's reach to HRISs, CRMs and ERPs. Plus, you can push/capture learning data to the external tools your learners' love, like Salesforce.com, SharePoint, LinkedIn and more!

Key Features & Benefits

Meets Trending Integration Needs
With the most published REST APIs, ExpertusONE already meets today's trending integration needs

- Supports real-time data flow between the LMS and other enterprise systems
- Offers connectors/integrations, including SAML, for fast implementation and excellent reliability
- Enables IT to quickly and affordably build integrations with other portals or externally embed LMS content
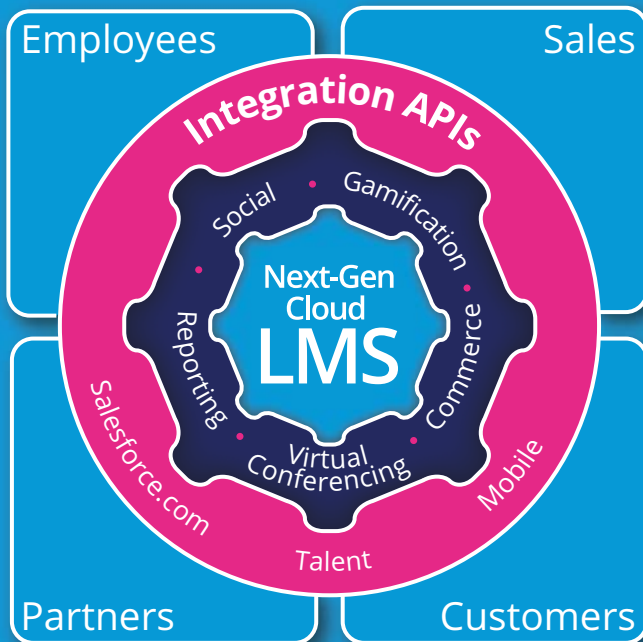

Extends Your LMS' Reach
Now you can easily link the LMS to other critical enterprise systems and external learner tools

- Two-way connections to your HRIS, CRM, SSO and ERP systems
- Use of ExpertusONE from SharePoint, Salesforce.com, LinkedIn, mobile apps and more
- Automatically pushes learning content out and returns captured data in from all linked systems

Superior Solution to Batch Feeds
Where "batch feed" integrations fail and take time to maintain, ExpertusONE's "web service" APIs ensure...

- Synchronized data in real-time between connected systems
- Faster deployments with simplified maintenance
- Customer IT self-service (lowers costs); limited vendor involvement (speeds deployment)

Innovative Salesforce.com Integration
Offer direct, real-time access to ExpertusONE from a "Learning" tab inside Salesforce.com

- Uses Salesforce and Expertus REST APIs to create a seamless end-user experience
- Also integrates with Salesforce.com Communities, making it easy to connect customers and partners to your training
- Configuration takes only minutes thanks to 100% pre-built integration

ExpertusONE Learning Suite

By empowering you to develop & maintain your own API integrations, ExpertusONE greatly reduces your total cost of ownership versus comparable LMSs. It's the quick, affordable link you've been looking for!
